www.fmredangus.com

Greetings in 2023. What a difference a year makes, from the drought in 2021, to much welcomed and timely rains in spring of 2022, bringing grass and a pretty decent hay crop. We have a great line up of yearling bulls and a couple of outstanding 2-year-olds for sale. EPD's rank predominantly in the top 20% for calving ease, stayability, and the profitability and sustainability index (Pro\$). They are a very uniform set of bulls in body conformation and disposition. You will be able to put together a great sire group of bloodlines, most of whom include LSF Night Calver 9921W, his sons or his sire.

We strive to focus on great maternal traits and calving ease in order for producers to have the mama cow factory to produce profitable calves with the least amount of labor and feed costs. Our commercial heifers are DNA tested and sire verified with the Red Angus Association Red Navigator tests which gives us information on how our bulls are doing and we can track our EPD improvements through the years.

Due to the 2021 drought, we only kept back 12 registered heifers and were quite pleased when they tested 100% bred last fall and with 8 of the 12 bred AI. Our 2022 registered heifer calves scored predominantly in the top 20% in the profitability and sustainability index (Pro\$), with half of them in the top 5%.

The bulls are on a mix of alfalfa and grass hay, an 18% protein cake and a good mineral program. The 2-year-olds are on winter pasture with good grass and supplemented with hay and cake during extreme cold and snow conditions. All bulls will have their breeding soundness exam and semen test in late March/early April by Drs. Jay and Brandi Hudson. 2-year-olds will also be trich tested. We have yet to have a bull fail his exam or semen test except for injury.

These bulls will be ready to go to their new home sometime around mid-April, depending on availability of our vets to get them tested as well as the weather and your needs. They won't be catalog picture-perfect and groomed but will be ready to go to work for you on the range. Please come visit and look them over and call if you have any questions or need further information.

We look forward to hearing from you!
Dudley & Marilyn

RED ANGUS GUIDE TO EPDS

For more information, visit RedAngus.org.

- HB** – HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** – GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)
- CED** – Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)
- BW** – Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)
- WW** – Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)
- YW** – Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)
- ADG** – Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

- DMI** – Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)
- MILK** – Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)
- HPG** – Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)
- CEM** – Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)
- STAY** – Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)
- MARB** – Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)
- YG** – Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)
- CW** – Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)
- REA** – Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)
- FAT** – Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

ProS - Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

AI SONS OF LSF PROSPECT 2035Z REG #1547645

We have used this son of LSF Night Calver 9921W for a couple of years. He has shown the same genetic potential, great body conformation and top EPD's as his sire. The last of the Night Calver semen sold in 2022 for \$175-\$200 per unit at Ludvigson's dispersal sale.

FM MACKEY NIGHT CALVER 703
REG # 3841659

This photo was taken on 9/11/21 after a 50 day breeding season with our commercial cows. He is a “cake lover”, will eat out of your hand and Dudley has loaded him in the trailer out in the pasture with just a bucket of cake. He has always been easy to handle and is not a fighter with the other bulls, yet has been a prolific sire based on the Red Navigator rest we have done on our commercial heifers for DNA and sire verification.

We are Beef Quality Assurance Certified - www.bqa.org

BULL BRED SONS OF FM MACKEY 5LGEN 195C 1904 REG #4148826

Both of his sons score really high in the profitability and sustainability (ProS) index. Respectable calving ease EPD's and top percentage Gridmaster, the progeny of these brothers should have great growth potential!

At FM Red Angus, we strongly believe in the importance of educating the next generation about agriculture and our Wyoming industries and resources. Wyoming Ag in the Classroom has developed an amazing curriculum which meets the education standards teachers are required to teach in social studies and science, enabling them to educate students in these areas using agriculture, energy, and outdoor recreation as the means to do so. Check out their website wyaitc.org to learn more about the great work they are doing.

Registered Cows Post Weaning - September 2022

"We've watched FM Red Angus select practical genetics while taking great pride in developing their bulls. Every year we are impressed with their bull's semen quality and feel these bulls will get out and do their job well."
Drs. Jay and Brandi Hudson Lazy H Large Animal Services, LLC

*May the road rise to meet you.
May the wind be always at your back.
May the sun shine warm upon your face.
May the rains fall soft upon your pastures.
And, until we meet again,
May God hold you in the hollow of His hand.
Irish blessing*
